Whether you are considering Microsoft Dynamics® AX or Microsoft Dynamics® NAV delivering this business critical software to your users 'in the cloud' could provide some big benefits to your business.

## THE CHALLENGE

A challenge for many organisations is how to keep business critical applications always available and aligned to their ever changing business processes. There is a need to scale the underpinning technology to support increasing transaction volumes, whilst maintaining the solution within a highly available and secure operating environment.

To overcome this challenge and provide our clients an implementation alternative, Tectura UK has partnered with Attenda. Through this partnership Tectura is able to offer its clients all the benefits of Microsoft Dynamics® with none of the challenges associated with buying and maintaining a complex IT infrastructure.

## WHY IN THE CLOUD?

By offering Microsoft Dynamics in the cloud, Tectura and Attenda are able to provide a comprehensive 24\*7 solution, offering guaranteed service levels for all users, leaving your internal IT resources free to focus on driving value within your business. Through this service Attenda will:

- Host and take operational responsibility for the smooth running of Microsoft Dynamics software
- Ensure the constant availability, performance and security of the software
- Deliver the IT infrastructure at a fixed price for the duration of the contract
- Use a highly skilled team of Microsoft professionals, experienced in the deployment, configuration and maintenance of the software
- Integrate with other Microsoft technologies such as BizTalk Server or SharePoint services
